The Skyscape & Horizon at Ballycroy Visitor Centre

The Horizon

For observers worldwide, the distant horizon is a magical interface between landscape and sky. The horizon delimits our view and is the domain where celestial bodies rise and set. It frames the transition from darkness to light and light to darkness.

Sunrise, summer solstice

Sunrise, winter solstice
c. December 21-22

The night sky at Ballycroy

Venus the 'Morning Star'

The Horizon and Dark Sky are critically important elements of our natural and cultural world. Each need protection from unnecessary light pollution.
