INTERACTIVE AND ACCESSIBLE PDFs

Gain the “know-how”

LEARNING OBJECTIVES

- Know how to create interactive PDFs
- Know how to create accessible PDFs

CREATING INTERACTIVE PDFs

HOW TO PREPARE

Get ready to create an interactive PDF:

Design with InDesign!	Design your pages in InDesign as you would normally do. Your document need to be (almost) finished before you start adding interactivity into it.
To interact or not to interact?	Decide which kind of interactivity you would like to add. Instructional design can help you on where it is useful to include interactive objects in order to not overdo it with them!
Identify the needs!	Prepare yourself for engaging interactive content! Identify your target audience and their needs, use marketing psychology to trigger their curiosity, use your creativity to make your content fun, combine data with visual content, invite your students to participate and last and most importantly, don't forget to personalize your content.

Read the [Golden Principles of High-Quality Instructional Design](#) to find out more!

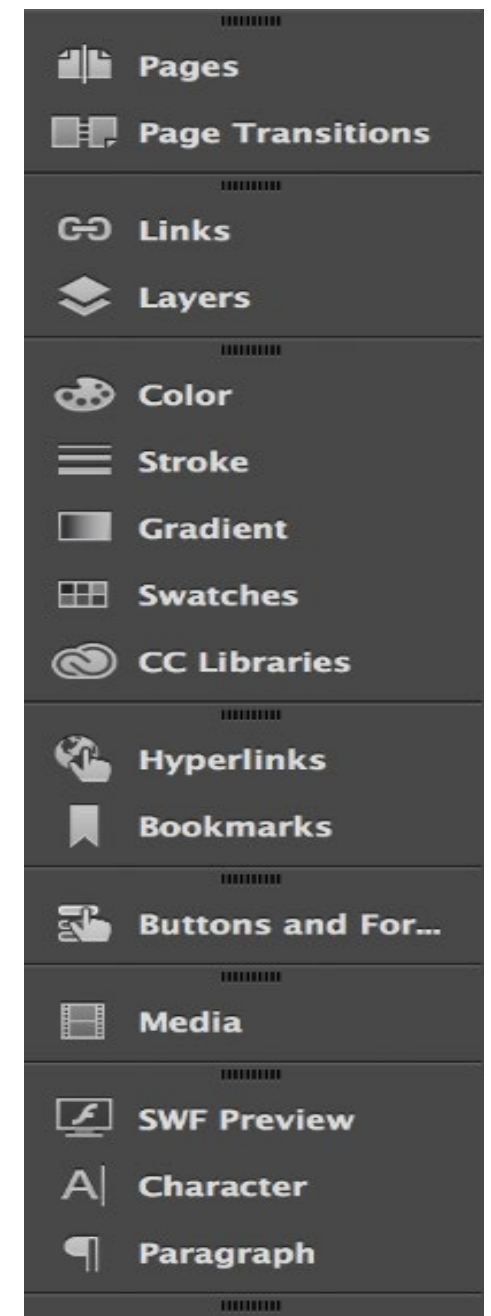

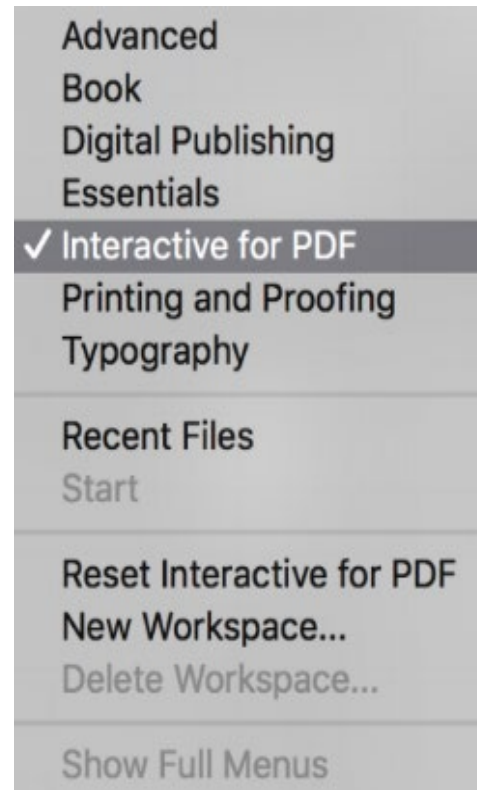

HOW TO CREATE YOUR OWN INTERACTIVE PDF

Once you are ready to go, all you have to do is follow the next 3 steps to create your own interactive PDF!

STEP 1

Open your InDesign file and select the Interactive for PDF Workspace. All panels are displayed on the right side of the screen

STEP 2

Add Hyperlinks

You can add hyperlinks by clicking the relevant panel and then selecting any element from your InDesign document.

In the Hyperlinks panel, click the 'Create New Hyperlink button' and add your hyperlink URL/file/email/page/destination/text anchor.

Those hyperlinks allow viewers to jump from location to another within the same document, or to other documents or websites.

STEP 3

Add Bookmarks

You can also add bookmarks to pages within the document by clicking on the 'Create New Bookmark' button in the Bookmarks panel.

OTHER RESOURCES

[Adobe Learn & Support](#)

Practice with sample files how add a splash of interactivity to make your PDFs more engaging

[YouTube](#)

There are several tutorials on YouTube that can help you learning how to create interactive PDFs

Tip:

Add a keyword that describe the purpose of your PDF (e.g. resume, flyer, etc.)

WHAT TO AVOID

There are many **mistakes** and **pitfalls** that are quite common for teachers. Be aware of them and differentiate yourself from the others!

1. Interactivity is exciting! But don't overdo it!
2. You have plenty of options! Remember to keep consistency throughout your content.

EVALUATE YOURSELF!

You can start creating your content before you explicitly define the needs of your audience.

Click on the correct answer

- A. [True](#)
- B. [False](#)

EVALUATE YOURSELF!

Answer A is incorrect!

You should always prepare yourself for engaging interactive content! Identify your target audience and their needs, use marketing psychology to trigger their curiosity, use your creativity to make your content fun, combine data with visual content, invite your students to participate and last and most importantly, don't forget to personalize your content.

EVALUATE YOURSELF!

Answer B is correct!

Identifying the needs of your audience is a key step in creating effective content!

CREATING ACCESSIBLE PDFs

HOW TO PREPARE

Get ready to create an accessible PDF:

Use more tags!	PDFs must be properly tagged, with tags that are generated during the conversion from Word to PDF.
Be an architect! Define the structure!	The structure must be clear and easy to follow. Headings, table of contents, links and bookmarks can keep your structural elements properly formatted.
Be alternative!	Visual content that reveals useful information should have text alternatives.
Watch your language!	The language of the material should be specified in advance.
Fast and secure!	The security settings of the document shall include users of assistive technologies.

HOW TO CREATE YOUR OWN ACCESSIBLE PDF

Once you are ready to go, all you have to do is follow the next 3 steps to create your PDF accessible!

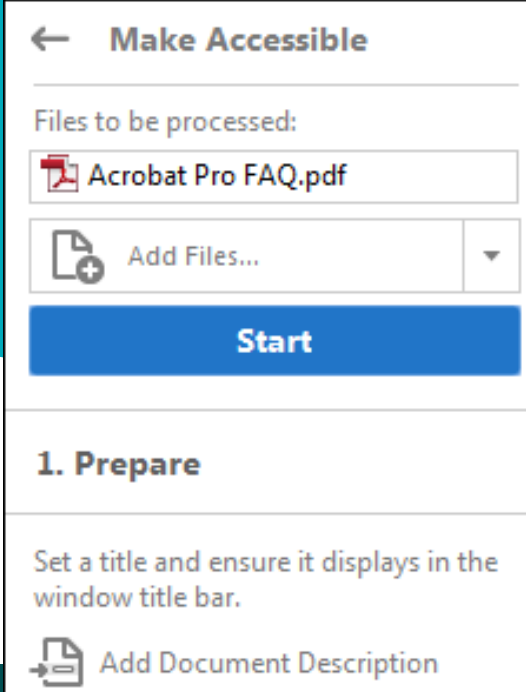

Activate the Make
Accessible action of Adobe
Pro Tool to see all the
guidelines you need

1

Select the files you want to
apply the predefined actions

2

← Make Accessible

Files to be processed:

 Acrobat Pro FAQ.pdf

 Add Files...

Start

1. Prepare

Set a title and ensure it displays in the window title bar.

 Add Document Description

Click start and follow the
instructions to complete the
Make Accessible action

3

[YouTube](#)

There are several tutorials on YouTube that can help you learning how to create interactive PDFs

WHAT TO AVOID

There are many **mistakes** and **pitfalls** that are quite common for teachers. Be aware of them and differentiate yourself from the others!

1. Do not use images just to decorate your content. All material included in your document should convey useful information.
2. Avoid repeating headers and footers.
3. Be careful of the colours! The background shall make a contrast with the foreground.

EVALUATE YOURSELF!

Which of these is a good piece of advice when creating accessible PDFs?

Click on the correct answer

- A. [Readers love images! You can use as many as you want](#)
- B. [Headers and footers shall be repeated in order for the readers to remember them](#)
- C. [The background should have a contrasting colour with the foreground](#)

EVALUATE YOURSELF!

Answer A is incorrect!

Screen reader users include people who are blind, have low vision, or have cognitive disabilities.

Avoid using non essential and non informative images such as decorative media. Use only relevant images and always add an alternative text.

EVALUATE YOURSELF!

Answer B is incorrect!

Some screen readers will automatically read header and footer information. Others require the user to navigate to the header or footer and manually “ask” for them to be read. Others leave headers and footers out completely.

While it’s important to mark header and footer information somewhere else in the text since headers and footers usually include essential information such as contacts, it can be frustrating for an impaired user to automatically hear this information every time they click on a new page.

EVALUATE YOURSELF!

The correct answer is C!

The background shall make a contrast with the foreground. This helps people with visibility problems to easily read your content.
