Sweeney, E. (2009) *Supply Chain Management and Logistics in a Volatile Global Environment*.

This Book is brought to you for free and open access by the National Institute for Transport and Logistics at ARROW@TU Dublin. It has been accepted for inclusion in Books/Book chapters by an authorized administrator of ARROW@TU Dublin. For more information, please contact arrow.admin@tudublin.ie, aisling.coyne@tudublin.ie, vera.kilshaw@tudublin.ie.

The current economic turbulence has thrown into light the absolute global nature of business in today's world. A key part of thriving and surviving on the global stage is the supply chain itself, vital to every business.

Following on from the acclaimed Perspectives on Supply Chain Management and Logistics (Blackhall Publishing, 2007) Supply Chain Management and Logistics in a Volatile Global Environment explores a range of supply chain management (SCM) and logistics challenges in the rapidly evolving global context. The book contains:

Contributed chapters from SCM thought leaders

Reflections on specific issues happening across a variety of industries

Implications of and tactics to deal with critical issues emerging from the SCM research agenda.

Aimed squarely at SCM and logistics professionals, this book will also reach a wider market of students,

researchers and policy makers.

Edward Sweeney is director of learning at the National Institute for Transport and Logistics (NITL), based at the Dublin Institute of Technology (DIT). At NITL he is responsible for the development and implementation of the integrated supply chain management (SCM) development programmes and he carries out research and consultancy work on behalf of NITL client companies. Edward has an engineering background and has worked and lectured in over 30 countries in Europe, North America and Asia.
