Gardens

Grow for it

Last chance in Antrim

If you’re up north today is the final day of the Antrim Garden Show, which opens to the public today. The show covers a variety of topics, including ornamental and edible plants, and features workshops on soil and compost. The show runs from 10am to 5pm and admission is free.

A date with dahlias

June 8-12

The Phipps Conservatory and Botanical Gardens presents "A Date with Dahlias," featuring 150 dahlias from around the world. The show runs from 10am to 5pm, and admission is $8 for adults and $6 for children.

The second is 'Globemaster', which has orange-red petals that persist for several weeks. In addition, the flowers have a longer flowering period than the first variety. Both varieties can be grown in pots or as houseplants, and they require ample sunlight and well-drained soil.

Lilium speciosum (syn. Lilium regale) is a species of lily native to Japan and Korea. It is a herbaceous perennial with a clump-forming habit. The flowers are white or pink, with a sweet fragrance, and bloom from June to August. The plant prefers full sun and well-drained soil.

The above two are members of the poppy family (Papaveraceae). They are elegant, arching-stemmed plants, and are easy to grow in most gardens. Both varieties are ideal for cutting and can be used in arrangements or as cut flowers.
