## Unite in action.

What is November the 17<sup>th</sup>, '94? How many times in the last week or two have you seen a Nov. 17. poster and said to yourself, what does it all mean?

On the aforementioned date, the students of this island will show the people of Ireland that they can unite to make change.

On that DATE there shall be a Demo. from Parnell st. commencing at 2 o'clock. The demo won't be just any ordinary demo. Does anyone remember been bored to tears with ineffective E.S.F. marches where all ya did was make a little noise. Well I know this march will be different. Why will it be different?, why isn't it going to be just another Demo.

Presently the Union of Students in Ireland are preparing a comprehensive document to be presented to the government on the 17<sup>th</sup>. The document shall contain proposals on the eradication of student hardship, improvement of college facilities, equality and access in education, graduate unemployment. So its not just about the grant.

The demo it self will be an explosion of attitude and creativity. Macnas, the Galway arts troop shall be involved, also their will be an open air gig directly after the demo at a city centre location. Your Students Union has set up a campaigns committee to motivate yis into participation, this will be the biggest demo ever. Change will noyt happen by itself. Make change happen.

# DYS . . . DYS . . . YDS . . . SDY . . . YSD . . . ..DYSLEXIA.

Dyslexia- a disease for middle class mothers ! Well believe it or not, that was what Dyslexia was defined as twelve years. ago.

Dyslexia is a specific learning disability

"Specific learning disability" is a term used to describe disorders in one or more of the processes involved in understanding and/or using writing, spelling or arithmetic. It affects approximately 8% of all children. They have difficulty changing oral words into written language and visa versa.

Nobody knows exactly how or why these difficulties with learning occur. They are thought to be due to differences in the way the brain works. A specific learning disability is not caused by a physical problem, a lack of intelligence and emotional disturbance, poor teaching and home or family problems.

Your will find that some people tend to hide dyslexia very well, as they are embarrassed and afraid to admit that they have learning disability. It's only a problem if you hide from its.

This year, Alison the S.U. Welfare Officer hopes that through speakers and workshops people can become educated about this ever growing problem.

If anyone has any queries feel free to contact Welfare Officer, or any member of the exec.

## GRUB HINTS

BY K.I.

Obviously, if you're reading this article, you are a student of Bolton Street. As all other classes of people, are not authorised to do so.

In my opinion, Bolton Street is the coolest D.I.T. College (please, fellow D.I.T.'s, do not take offence). I feel after studying here for the past four years in Bolton Street, that I am now fully qualified to talk about B. St. DIT.

The first item I think of is, the Grub (of course). Also the number of people in Bolton Street is increasing and this results in overcrowding in lecture theatres, in labs and in the canteen. Lunchtime in the canteen is bedlum.

- Lack of table space to eat your GRUB
- By the time you get a table for your food is gone cold.
- Then, eating your GRUB too fast gives you digestion
- The bloody queue is a mile long.

However, advantages of the bedlum are

- Getting free sausages by accident
- Buy one coke get one free scenario.

But when all is said and done the food is'nt half bad in the canteen. There haven't been too many deaths from food poisoning, the staff are pretty friendly and please remember everyone *this is a self-service restaurant, please return your tray, delph, cutlery to the conveyor belt as you leave* (so have a little heart and help the girls out).

So that's the scam dealt with. I'll now move onto a subject that is always a topic of conversation, "The Lecturers". Recently scientists from DIT Kevin St., have done a survey and results show Lecturers are a special breed of people. Results have shown that parents are from up to 20-30 years advanced to breed these special people. These special people grow up together and to a special. Later on in life, when they finally become lecturers our research has shown that these people seem to dress alike, speak the same and all lack a sense of humour. However certain freaks have been known to escape this net of uniformity and will display a sense of humour, modern dress and will have good relations with their students.

But when all is said and done, and exam and hint time comes round, the Lecturers seem be the best thing since sliced bread,. I consider these two aspects to be two of the most important. So just a quick note to finish. Don't go choking on your grub and be extra nice to lecturers around exam time.

Truth is a dangerous enemy when seen in certain shades.  
 Its not black nor white  
 But a host of rainbow greys  
 To see the world with glasses red.  
 No eyes open wide its  
 A dangerous way of living  
 It'll soon bring our demise.

But truth is such a strange thing  
 It's all mixed up with lies and the path of the right and righteous  
 Isn't obvious to the wise and the fools who blunder blindly  
 Get confused and lose their way  
 And the wise who sit in silence and wait for the dark to take them away.
