Community Based Research by Applying Chemistry

Road Safety Awareness - Breath & Urine Testing for Alcohol & Development of Roadside Drug Testing Methods

Final year students on the BSc in Forensic & Environmental Chemistry determined alcohol concentrations in breath & urine samples provided anonymously by their peers. The purpose is to raise awareness of road safety as part of the DIT College Awareness of Road Safety (CARS) initiative. A breath test survey was also carried out with students the morning after a Rag Week event using breathalysers provided by the Garda Road Safety Unit. In 2017, a student raised awareness of the rollout of roadside drug testing by creating a video and also worked on the detection of components of cannabis in oral fluids.

(Staff involved: Dr Cora O’Donnell, Dr Vanessa Murphy, Dr John Fox & Dr Claire Mc Donnell)

Student Placements with Wells for Zoe Charity in Malawi

In 2012, two students from Year 3 of the BSc in Forensic & Environmental Chemistry spent 6 weeks in Malawi with the Wells for Zoe charity. They worked with second level science teachers and tested local water & soil quality as well as helping to manufacture water pumps. The students continued their placement in DIT and performed further soil analysis and developed chemistry lab teaching and learning activities suitable for use with limited resources.

(Staff involved: Dr Claire Mc Donnell, Prof John Cassidy & Mr Ciarán O’Leary)

Development of a liquid soap product from waste food carrier oils with the Lifeline Project

In 2017, work began on this project to develop a method to convert waste oils into household cleaning products.

Why Get Involved in SLWC Projects?

Students can work in a real life environment, see how their discipline knowledge is applied and learn from their community partners. DIT staff get to work for the benefit of the community as part of their job & invariably find these assignments more rewarding, interesting & enjoyable than traditional approaches.
