D.I.T.

- 125 year history
- combines the academic excellence of a traditional university with career-focused learning
- Student numbers currently 19,500.
- Shortly in transition to new Dublin city centre campus
Current and projected student numbers

<table>
<thead>

The Irish perspective

- Irish higher education now at a point of transition
  - Student numbers and participation: increase from 5% in 1960 to 65% in 2010
  - Numbers enrolled are expected to rise continuously: 2019 +7%, 2029 +24%
  - Changing profile of student: demographics, learning styles & their impact on engagement
  - New emphasis on high order knowledge-based skills
  - Economic & recessionary pressures
  - Renewed interest in:
    - Quality of the student experience/strengthening student engagement
    - Broadening the curriculum
    - Adaptability & entrepreneurial skills
    - Particular emphasis on the first-year experience

(“Hunt Report” 2011
Dept. of Education & Skills 2013
ESRI Nov 2012)

Development of key skills
- the national picture

Range of key generic skills identified:

- Critical thinking
- Creativity
- Communication skills
- Team skills
- Leadership ability

“The simple acquisition of knowledge is not enough to count as an education”

(Hunt Report 2011, p. 79)
Development of key skills
- the local/D.I.T. picture

- An environment of change for all stakeholders was identified (post 2007):
  - Opportunities and challenges
    - Engagement and retention
    - Student motivation
    - Professional and personal development
    - Oral and written communication problems
    - Students’ ability to manage work and learning
    - Increased demands on curriculum space

“Key skills” set identified
Theoretical underpinnings

Strengthening student engagement
- the theoretical challenges

Engagement-based Learning & Teaching approach (Jones 2009)
1. Cultivate one-on-one relationships
2. Learn new skills & habits
3. Incorporate systematic strategies
4. Take responsibility for student engagement practices
5. Promote a school/department-wide culture of engagement
6. Focus on professional development of staff

Strengthening student engagement
- the practical challenges?
The Get Smart! initiative

- Self-management
- Information management
- Group management
- Socialisation
- Writing & communication skills
- Professional development
- Employability
- Personal development & peer mentoring

Get Smart!

- An initiative developed through a bottom-up lecturer-led approach through which the emphasis is on teaching through engagement
- Designed to communicate with students in their language as well as formal communication modes;
- Sits laterally across modules and forms an integrating mechanism between academic and non-academic areas;
- Embeds learning strategies, information literacy, study skills, personal & professional development into all first year module content.

Teaching for engagement – closing the loop

- Supportive feedback on formative assessment
- Teaching for student engagement
  - "The potential for enthusiastic engagement in the curricula should be harnessed in the critical first days of the first weeks of the first year, thereby promoting a sense of belonging, so often missing for the contemporary learner" (Kitt & Nelson 2005, p. 229)
  - Induction – a new approach
  - Getting a buzz – Get Smart! workshop
Lessons learned from Get Smart!

The positives
- Inspirational & motivating
- Influence other schools
- Hawthorne effect
- 'Teaching Excellence' award 2013

The negatives
- Can we be 'friends'? No!
- Can the results really be quantified?
- What happens after first year?
- What if resources/goodwill dry up?

Conclusion
A journey of chaos & cultural change... and trying to quantify the unquantifiable?

- Students only learn in an engaged environment
- Emergent role of lecturer as a provider of (academic) support mechanisms;
- New modes of communication employed (with varying degrees of success);
- The lecturer may now be viewed as an enhancer of the selected key skills;
- Need to interact strongly with non-academic areas.
