Pilgrim-paths on Malta after a German model?

Pastor Stephan Meyer-Schuerg

This presentation is a showcase of a successful new pilgrim trail project. Through a smart combination of sponsorships and involvement of local communities, a number of trails in this region were designed, developed and realised. Since this is a community-based initiative, the trial and its art is regularly monitored by several volunteers who also offer interpretation services to visitors. The trails are accessible either on foot, on bicycle or by car. The goal of these trails is to emphasise on the authenticity of landscape and churches, to promote community spirit and endeavour to bring fulfilment in many ways to the participants.
