Location Map Inside Cover
his booklet has been prepared to provide you with information about the whole-time courses offered by the College of Technology, Bolton Street, Dublin 1 and the method of applying for them. We are conscious of the difficulties facing young people in deciding on careers and selecting the most suitable courses to prepare for them. We hope that you will find the booklet informative and helpful. We take care in selecting and advising students and we encourage you to consider carefully the options that may be available to you.

Since Bolton Street is but one of the six Colleges of the Dublin Institute of Technology, each of which plays a complementary role in the provision of third level education, its range of programmes is necessarily concentrated. We offer considerable opportunities to those wishing to prepare for the important professions of Architecture, Engineering and Surveying and careers related to these disciplines in Construction, Manufacturing and Transport. The College is also the main centre in Ireland preparing young people for entry into the Printing industry. Each of these sectors makes a vital and major contribution to the economy and consequently must offer many challenging and rewarding job opportunities in the decades ahead.

There are many things one could say about the College and its programmes which may interest you. It is a technological educational institution with the prime objective of assisting young people to acquire the knowledge and skills necessary for a fulfilling and rewarding career. Our well qualified and experienced staff and extensive range of laboratories, workshops and other facilities provide the basis for a vigorous and lively academic community. The College has a national and international reputation and the record of achievement by its graduates is something for which it is justifiably proud. If you decide to apply and are admitted we hope that you will enjoy your stay with us.

Michael O'Donnell

Five
PROFILE OF THE COLLEGE

The College of Technology, Bolton Street, is the largest of the six colleges which make up the Dublin Institute of Technology. The other five Colleges are: College of Technology, Kevin Street, Dublin 8, College of Commerce, Rathmines, Dublin 6, College of Marketing & Design, Mountjoy Square, Dublin 1, Dublin College of Catering, Cathal Brugha Street, Dublin 1, College of Music, Chatham Row, Dublin 2. It was opened in 1911 to provide courses in various aspects of Construction, Engineering and Printing. It was one of the first Irish buildings specially designed for technical/technological education and while it has undergone major extensions to cater for expanding demands its original distinctive facade remains. Over the years the College has provided opportunities for thousands of young people to qualify as architects, engineers, surveyors, technologists, technicians and craftsmen, thus enabling it to play a strategic role in developing the Irish economy.

Today the College has responsibility both nationally and regionally for the provision of comprehensive programmes of technical and technological education in each of its major disciplines. It has about 6,000 students of whom 1,800 are full time third level students. It is organised into eleven departments; Architecture and Town Planning; Engineering Technology; Surveying & Building; Science, Mathematics and General Studies; Aeronautical Engineering; Automobile Engineering; Building Trades; Engineering Trades; Metal Fabrication; Printing and Book Production.

Full-time courses at degree level are offered in Architecture, Construction Economics, Property Economics, Mechanical Engineering, Production Engineering, Structural Engineering and Building Services Engineering. Full time technician courses are offered in the fields of Architecture, Auctioneering and Estate Agency, Construction, Civil Engineering, Building Services Engineering, Mechanical Engineering, Motor Engineering, Buildings Maintenance, Geo-Surveying, Graphic Reproduction Technology and Printing. The College caters for some twenty trades through part-time day and block release courses, including Building, Cabinet Making, Painting, Metal Fabrication, Aeronautical, Automobile and other Engineering Trades, Printing and Book Production. In addition, the College offers many other part-time day, evening and short courses at professional, technician and craft levels.

The close links which exist between the college and industry are strengthened by the large number of part-time and block-release students attending the College. In addition full-time students usually engage in professional and industrial training during summer vacation periods. Project work, which forms a core in full-time courses, is frequently based on industrial or community problems. To assist in updating the courses, the College has a number of Advisory Committees drawn from industry, the professions and other appropriate organisations.

A prominent feature of the College's research activity is its concern with the Built Environment which in turn may involve participation by the Departments of Architecture and Surveying in community projects and other development programmes. Other Departments co-operate closely with industry in a number of research and development projects as well as in the more specific areas of education and training.

Central Social Area of the College which is a feature of the major new extension.
HOW TO APPLY

(1) DEGREE LEVEL COURSES IN C.A.O. SCHEME

The following College degree level courses are in the CAO scheme. Graduates of these courses are eligible to receive DIT Diplomas and are also eligible to receive degree awards of the University of Dublin (Trinity College).

*These four courses have a common First Year. The allocation of Second Year places on one or other of the courses will be in accordance with the students choice, subject to availability. The final assignment of places in the Second Year of the courses will be at the discretion of the Department of Engineering Technology.

Applicants for any of the above degree level courses in the CAO scheme should apply directly to:

The Central Applications Office,
Tower House,
Eglington Street,
Galway.

It is essential that applicants adhere to the procedures described in the CAO Handbook.

CAO Closing Date: Irish Applicants – 1st February 1989 (5.15 pm).

CAO Application Fee:

Irish Applicants .................................................. IRE18.00
Late Application Fee ............................................. IRE40.00

Note:

(i) There will be a period of grace for the receipt of Irish applications during which such applications may be accepted at a fee of IRE25.00. This period will last from February 2nd to March 1st inclusive. Such applications are not considered to be late: late applications are those received for the first time after March 1st.

(ii) Re-applications will not be accepted in respect of College degree level courses in CAO’s scheme.

(iii) Applicants may not introduce FT01 into an application for the first time after 1st March, 1989.

(iv) Late applications received by 1st August 1989 for the other Bolton Street courses listed above will be considered together with normal applications on the basis of merit. Late applications received by the CAO for DIT courses after that date will not be accepted.

(v) Applications from mature students and overseas students for DIT courses are not processed through CAO. Such applications must be made directly to DIT, 14 Upper Mount Street, Dublin 2 on or before 10th February, 1989. Applicants are advised to read the 1989 CAO Handbook carefully before making application.

(vi) When submitting an application to CAO, applicants should ensure that all information entered on the form is accurate and legible. The Central Applications Office makes a charge for the return of incorrect and/or incomplete application forms.

(II) TECHNICIAN AND OTHER WHOLETIME COURSES PROCESSED THROUGH THE DIT APPLICATIONS OFFICE

Applications for admission to the College’s technician and other wholetime courses not in the CAO system, which are listed below, should be made to the Dublin Institute of Technology on the standard DIT application forms.

** Denotes courses for which ESF support is available in 1988/89 session.

* Application for admission to course B131 must be made directly to the College. Applicants should note that an appropriate Third Level award is necessary to gain entry to the course and it is not open to school leavers for direct entry.

The DIT Applications Procedures is divided into two parts:

Part 1

This involves the submission of a completed Part 1 DIT application form accompanied by Section A of a BANK GIRO duly stamped to certify that the appropriate application fee, as shown below, has been lodged. These should be forwarded to:
to reach there not later than 10th February 1989 (24th February on payment of higher fee). Applications will be acknowledged within one month of their arrival. Applicants other than transferee, mature and overseas students (see below) will be sent applications between 25th February and 1st June 1989.

This Part 2 DIT application form will show clearly the date by which it must be returned to courses for which aptitude assessments will have already been held. These courses will be listed on the Part 2 application form.

Due to severe time constraints in the final processing of applications in late August, applicants are advised that the Institute will adhere strictly to the Part 2 DIT applications closing date.

The return of the Part 2 DIT application form is an essential part of the application procedure. Candidates not returning it to the DIT Admission Office by the specified closing date will not be considered further by the Institute and their applications will be deemed to have lapsed.

Applications who are likely to be away from their permanent home address around this period should arrange with a reliable person to deal promptly with DIT correspondence. In this context applicants should note the importance of their permanent home address as specified on their Part 1 DIT application form and any change in this address should be notified to the Institute in writing.

(III) SPECIAL CATEGORY APPLICANTS
The following types of applicants are treated as special cases and are processed separately from the main stream of candidates. All such applicants should apply directly to the Dublin Institute of Technology on the Part 1 application form, by the closing date. When returning the completed form they should indicate clearly that they wish to be considered as a special case and include all documentary evidence available, including examination results, in support of their application.

(a) Mature Applicants
A mature student who is 24 years of age or over at the time of enrolment and who does not meet the normal minimum admission requirements may be considered for admission to appropriate courses after attending in person for interview and satisfying the College Authorities as to his/her ability to benefit from the proposed course. Such applicants may be required to sit and pass an entrance test or a suitability test before admission. The Application Form should be clearly marked “Mature Applicant” on the front. Otherwise it will be treated as a normal application and you may not be considered for any course.

Applicants who are being considered in this category will not be required to complete the Application Form – Part 2 in August.

(b) Overseas Students
Overseas students seeking admission to the College should apply to the Dublin Institute of Technology, 14 Upper Mount Street, Dublin 2, not later than 10th February using the standard application form available on request. When completed this should be forwarded with documentary evidence of qualifications in English (translations should be certified by an appropriate authority) showing subjects passed, levels and grades obtained.

Because of the large number of applications received each year from qualified Irish applicants, and the limited number of places available, the College regrets it has to limit admission of overseas applicants to the small quota of places reserved for those who are sponsored by official agencies linked to Ireland’s development aid programme.

(c) Trade Students
Students holding the Senior Trade Certificate of the Department of Education with one endorsement in mathematics or a science subject satisfy the minimum entrance requirements for courses in the DIT Colleges which specify a pass in five subjects in the Leaving Certificate Examination as the entrance requirement. Students holding this Certificate with three endorsements in academic subjects are eligible for consideration for entry into related professional/degree level courses provided that they also meet any special entry requirements (e.g. Higher Level Mathematics for Engineering courses). Where endorsement subjects are not offered in the trade examinations, a pass in an appropriate subject of the Elementary Technological Certificate Examinations of the Department of Education is an acceptable equivalent.

(d) Holders of N.C.E.A. National Certificates and Diplomas or Similar Level Awards
Applications should be made to the DIT Admissions Office by submitting Part 1 DIT application form and Section A of the bank GIRO, duly stamped to certify that the appropriate application fee of £8 has been lodged.

Applicants should request their former College to forward in confidence to the Admissions Office a full transcript of results (including subjects studied and grades obtained) not later than 10th July. The applications will not be processed until this has been received.
Note:
Due to the inclusion of aptitude tests as part of the selection process for courses B101 and B102, applications for these courses must be made on or before 24th February 1989.

(e) Applicants Seeking Exemptions from one or more years of a Course
The general procedure is as in (d). Such applicants should ask their former College to forward in confidence to the Admissions Office, a full transcript of previous attainments which it is claimed will justify the exemptions sought. The application will not be processed until this is received.

(f) Transfer/Re-Entry Applications
Current students who wish to transfer from one course to another within the College or previous wholetime students who wish to re-enter the College should apply on the appropriate form to the College Admissions Office, Room 315, College of Technology, Bolton Street, Dublin.

Further information in respect of Special Category Applicants is available on request from the College Admissions Office.

</tr>
</tbody>
</table>

Due to the inclusion of aptitude tests and interviews in the selection process it is not feasible to give the number of points which were required to gain entry to course FT01 (B101) Architecture in 1988.

Note
Not all applicants who scored the above number of points obtained placed in 1988.

(ii) TECHNICIAN LEVEL COURSES
B102, B114, B115, B116, B120, B130, B150, B171: Irish Leaving Certificate with passes in five subjects which must include Mathematics and English.
B126, B127, B128: Irish Leaving Certificate with passes in five subjects which must include Mathematics, English and one of the following science subjects: Physics, (preferably) Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies, Technical Drawing, Engineering.

Qualifications other than Irish Department of Education Leaving Certificate
The college also gives consideration to qualifications other than the Irish Leaving Certificate and the points system given in the next section indicates the approach which is adopted in respect of the NUI Matriculation. Please note that the additional weighting factors in the case of course FT04 apply only to the Leaving Certificate Mathematics and Science subjects and not to these subjects in the Matriculation.

General Certificate of Education (GCE)
The minimum entry requirement to technician level courses is the General Certificate of Education Ordinary Level in five subjects, including good passes in English and Mathematics, or equivalent qualifications.

Applicants for degree level courses are required to have the G.C.E. with passes in six subjects including at least two good Advanced Level subjects or equivalent. Overseas applicants must satisfy the College as to their proficiency in written and spoken English.
Grades A, B and C in the GCE Advanced Level meet the higher level paper requirements for degree level courses.

Grades D and E in the GCE Advanced Level or Grades A, B and C in the Ordinary Level GCE are regarded as equivalent to ordinary Leaving Certificate passes.

DIT POINTS SYSTEM

The following table shows the points used to calculate educational scores for all the College's wholetime courses except FT04, B126, B127 and B128 (see notes below).

<table>
<thead>

COURSES FT04:
An Enhanced Points Weighting applies to certain subjects for the Engineering Courses FT04 but only in respect of Higher Leaving Certificate Papers as follows:

The following points scores are awarded to grades A to C on the Higher Leaving Certificate paper in Mathematics: A, 14; B, 12; C, 10.

The following points scores are awarded to grades A to C on the Higher Leaving Certificate papers in Physics, Chemistry, Physics with Chemistry, Applied Mathematics and Engineering: A—11, B—9, C—7

ENGINEERING TECHNICIAN COURSES:
In evaluating educational scores for the Engineering Technician courses B126, B127 and B128 a weighting factor of 1.5 is applied to Mathematics and a weighting of 1.2 is applied to the following subjects which have special relevance: Physics, Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies, Technical Drawing and Engineering. The points are rounded up to the nearest whole number e.g.

Grade B in higher level Mathematics = 11 Points
Grade B in higher level Physics = 8 Points
Grade A in ordinary level Mathematics = 8 Points
Grade A in ordinary level Physics = 6 Points

Minimum Entry Standards for Technician Level Courses in 1988
Due to the inclusion of an interview as part of the selection process it is not feasible to indicate the points levels which were necessary to gain entry into the different courses in 1988. However it can be stated that a good performance in the Leaving Certificate, even at Pass level, enhances the applicant's prospects as each candidates educational score is evaluated in accordance with the above points system.

SELECTATION OF APPLICANTS

(I) DEGREE LEVEL COURSES
Applicants are placed in order of merit in accordance with the D.I.T. points system (see page 11). Points are allocated to the best results in six subjects (including Mathematics and English) obtained in one or more school leaving examinations having regard to the relevant course entry requirements. Generally demand exceeds places available and qualifications well above the minimum will be required. In the case of Architecture, applicants will be required to take a suitability test and this will be used in determining which applicants are called for interview. The results of suitability tests and interviews will be combined with the total educational points scored to give an overall rating.

It is anticipated that the suitability tests for the Architecture Course B101 will be held in March/April 1989. Applicants who have not been notified by the end of April as to when they should take their test should contact the College.

Offers of places will be made by the CAO in August.

(II) TECHNICIAN LEVEL COURSES
In the case of technician courses in the College (with the exception of the Architectural Technician Course – B102) applicants who meet the minimum educational requirements and are being considered for entry into the different courses can expect a written communication from the Admissions Office of the Institute in late August inviting them to attend for interview in the College at a specified time during the first week in September. Applicants for the Architectural Technician Course (B102) will be required to take a suitability test and this will be used in determining which applicants are called for interview. It is anticipated that these tests will be held in March/April 1989. Applicants who have not been notified of the test by the end of April should contact the College.

In most cases all qualified applicants will be called for interview for courses in which they have expressed an interest. However in cases where this is not feasible due to the very large number of applications, candidates will be selected for interview on the basis of their educational points score.

Educational points are allocated to the best results in five subjects (including Mathematics and English) obtained in one or more school leaving examinations, having regard to the relevant course entry requirements. Generally demand exceeds the number of places available and qualifications above the minimum are required.

Applicants are selected on the basis of their school leaving examination results, (see page 11 for DIT Points system), performance at interview and where appropriate, relevant work experience and knowledge of the career for which the course prepares students.

An applicant will be offered a place in the highest of his course preferences for which he is qualified (if any). An applicant who has been offered a place in one of his course preferences is excluded from further consideration for any course which is lower in his order of preference than the one in which he has been offered a place. This means that while an applicant may subsequently move upwards in his order of preference (if places
become available) he will not be considered for a place in a course which is a lower preference than that already offered.

An applicant who is being offered a place on a course will be sent a formal offer together with the necessary instructions regarding the acceptance procedure. It will be necessary to reply to the offer within a short period of time and to pay a deposit to secure a place.

An applicant who is being offered a place in a course which is not his first preference may subsequently be offered a place in a course of higher preference if such a place becomes available. This applies whether or not the earlier offer has been accepted by the applicant.

It is hoped to make offers during the week commencing 11th September in the case of courses where interviews form part of the selection process.

---

### COURSE FEES, GRANTS AND SCHOLARSHIP

#### COURSE FEES SESSION 1988/89

* Students who are enrolled through Irish Government Agencies may be admitted on paying the same fees as Irish students. The foreign student fee is applicable to all other non-EEC nationals.

Fees are payable on enrolment before commencing attendance at classes and are not refundable except where a class or course does not form. An enrolment is not transferable from one student to another. ALL COURSES AND EXAMINATION FEES QUOTED ARE SUBJECT TO REVISION.

---

### Grants and Scholarships

(a) Local Authority Grants: Students who register for the Diploma/Degree level courses conducted by the College are eligible to apply to the Local Authority where their parents or guardians normally reside for a Higher Education Grant. Information on eligibility conditions and application forms are available from the appropriate Local Authority (County Council or Corporation).

(b) VEC Scholarships: Students who register for courses leading to Certificate or Diploma awards are eligible to apply to the Vocational Education Committee of the area where their parents or guardians normally reside for a VEC Scholarship. Information on eligibility conditions and application forms are available from the appropriate Vocational Education Committee.

(c) ESF Training Grants: ESF (European Social Fund) training grants may be available to Irish students aged between 16 and 25 years while they are pursuing certain two year courses provided their attendance record and general performance is satisfactory. These grants cover tuition fees and also provide for payment of a monthly allowance. The courses which were included in the scheme in the 1988/89 session were B114, B115, B116, B126, B127, B128, B130, B150 and B171 and are marked by a double asterisk (**) in the Table on Page 0. The grant covers tuition fees and a payment of £14-16 or £35-56 per week, depending on the place of normal family residence of the student.

---

The Principal of the College Mr. Michael O'Donnell; the chairman of College Council and CDVEC, Councillor Patrick Carey; the Minister for Education, Mrs. Mary O'Rourke TD; the Minister for Sport, Mr. Frank Fahy TD; and the Chief Executive Officer of CDVEC, Mr. Liam Arundel, in the new College courtyard.
AWARDS AND ACCREDITATION OF COURSES

All whole-time third-level courses conducted by the College (except the Preliminary Engineering Course B120) lead to Dublin Institute of Technology (DIT) Diploma or Certificate awards as appropriate. The majority of these awards are of long standing and are widely recognised by employers, professional bodies and academic institutions in Ireland and abroad. The courses are reviewed and assessed regularly and their standards are vouched for each year by a distinguished panel of external examiners, some of whom are drawn from other countries to ensure the international recognition of the awards.

In respect of a number of the courses there is a system of parallel awards available to those graduating. In 1975 the City of Dublin Vocational Education Committee and the University of Dublin entered into a formal agreement by which degree awards of the University with Honours classifications are available to graduates of the College who successfully complete appropriate courses in Architecture, Engineering and Surveying. Details of these awards are given under the individual course entries.

Since 1972 National Certificate and Diploma awards have been made to those graduating from the Building Services Civil and Mechanical Engineering Technician programmes by the National Council for Educational Awards (N.C.E.A.). More recently, similar arrangements were made in relation to the Geo-Surveying Technician course.

The College attaches high priority to ensuring that its graduates meet the academic requirements of the appropriate professional bodies and periodically it receives visitations from them to accredit the various course programmes.

Under a Partnership Agreement with the University of Dublin students of eight professional diploma courses conducted by the College are also eligible for appropriate degree awards with honours classification from the University without taking further examinations. Above is a group of architectural graduates having received their BArch Sc Degree Awards.
OUTLINING OF FULL TIME COURSES

B101

B101 ARCHITECTURE - DIPLOMA/DEGREE

C.A.O. Course Code: FT01

This is a five year wholetime course which prepares students wishing to make their careers in Architecture. The course covers a wide range of subjects and aims at a synthesis of knowledge gained from the use of these subjects in architectural design projects culminating in a Final Year Thesis in the design of a major building. Students are required to gain professional experience in architectural office practice during the summer vacations and, in this way, support their study and their ability to work individually, or as members of a team.

Entrance Requirements:
The minimum educational qualifications required for entry are the Irish Leaving Certificate with passes in six subjects, at least two of which must be at Grade C or higher in the higher level course, or equivalent qualifications. The six subjects must include Mathematics and English.

Applications will be required to undertake an aptitude test and, if successful in this, they are also interviewed as part of the selection process.

First Year:
Course of Study:
Studio Work; Physics 1, Chemistry 1, Mathematics & Statistics, Civilisation Studies 1, Theory of Architecture, Mechanics, Building Construction 1, Trade Practice.

Second Year:

Third Year:

Fourth Year:

Fifth Year:
Studio Work; Economics and Cost Control, Urban Design, Professional Practice II, Structural Engineering IV, Conservation Studies, Building Construction V.

Awards:
Graduates of this course are eligible for the following awards:
Diploma in Architecture (Dublin Institute of Technology)
Bachelor of Architectural Science (University of Dublin)

They are also eligible on graduation for Associate Membership of the Royal Institute of Architects of Ireland. Following two years of post graduate experience they may take the Institute's examination in Professional competence and thus become Members of the RIAI.

Success in the year of the Diploma in Architecture Course gives exemption from the Intermediate Examinations of the RIAI.

The Diploma in Architecture of the College is a qualification which is recognised for the profession of architect in member States of the European Community.

Career Opportunities
The qualification is for the profession of Architect. Architects are concerned with the design of buildings and supervision of building projects. They may practice in a personal professional capacity, or in employment in private and public sector organisations. The field of practice is quite extensive in Ireland and abroad and may offer alternatives of general practice or specialisation throughout a career. Graduates from the course to date have found employment either in private practice or in the public service. Some spend a time abroad to gain wider and more varied design experience.

The course and the career require a creative aptitude for design on the scale of architecture and the organisational ability for its implementation in practice. The range of subject material in the course is wide, and calls for an interest and ability in artistic and cultural aspects as well as in technical matters and in managerial skills.

Dept. In Charge
Architecture & Town Planning.

B102

ARCHITECTURAL TECHNICIAN DIPLOMA

This is a three-year wholetime course leading to an Architectural Technician Diploma award. It aims to give the student a high standard of architectural and technical drawing and presentation, with a good knowledge of building construction, materials, methods and equipment. The course uses the project system extensively during which students are required to prepare working drawings, details, schedules, etc. for building work. Lectures in selected subjects such as Building Construction, Structures, Materials and Services are integrated with the projects as far as possible. During the summer vacation period students are encouraged to obtain suitable practical work experience to complement their College training.

Entrance Requirements
Leaving Certificate with passes in five subjects including Mathematics and English or equivalent qualifications. Applicants will be required to undertake an aptitude test, and if successful in this they are also interviewed as part of the selection process.
Course of Study

First Year

Second Year

Third Year

Awards
Graduates from this course are eligible for the following award: Architectural Technician Diploma (Dublin Institute of Technology).

This Diploma is recognised for Technician Membership by both the Incorporated Association of Architects and Surveyors, and the Royal Institute of the Architects of Ireland. It is also recognised for Associate Membership of the British Institute of Architectural Technicians (BIAT) and for full Membership subject to approved post-graduate experience.

Career Opportunities
The majority of graduate Architectural Technicians are employed in private professional architectural offices. Other areas of employment are the architectural and technical sections of Government Departments, Semi-State bodies, Local Authorities, and the building industry generally, with Contractors and Manufacturers.

A number choose to work overseas for a few years to gain useful and wider experience.

Dept. in Charge: Architecture & Town Planning.

Architectural Design project.

CAO Course Code FT03
This is a four year wholtime course which prepares students who wish to make their careers in Valuation Surveying, Property Management and Investment, and Estate Agency. It is also suitable for those interested in Property Development and Town Planning. It is designed for those who wish to work as valuers, estate agents, property advisors, developers and planners. The course provides an education in the financial, legal, planning and construction aspects of property in the context of the investment market in general and it provides students with a thorough understanding of the economic functioning of the built environment.

Entrance Requirements:
The minimum educational qualifications required for entry are the Irish Leaving Certificate with passes in six subjects, at least two of which must be at Grade C or higher in higher level papers or equivalent qualifications. The six subjects passed must include Mathematics and English.

First Year

Second Year
Law; Construction Technology, Property Management and Marketing, Quantitative Methods, Valuations, Planning, Economics.

Third Year
Maintenance of Buildings, Valuations, Urban Economics, Planning, Law, Taxation, Investment Analysis. During this year students undertake a major integrated project.

Fourth Year
Valuations, Urban Economics, Planning, Taxation. In the fourth year each student prepares a major dissertation as part of the Final Examination.

Awards
Graduates of this course are eligible for the following awards: Diploma In Property Economics (Dublin Institute of Technology) Bachelor of Science (Surveying) (University of Dublin).

Recognition by Professional Bodies
Upon successful completion of a test of professional competence, holders of these awards are eligible for Corporate Membership of the Royal Institute of Chartered Surveyors (General Practice Division). They are exempted from the Intermediate Examination of the Royal Town Planning Institute and are also accepted for entry to appropriate Post-Graduate courses in Ireland and abroad. The course is also recognised by the Irish Auctioneers and Valuers Institute.
Career Opportunities
The qualification is for the profession of Chartered Surveyors, which includes occupations in the field of construction and property management.

Property Economists are concerned with the broader areas of land and property development, valuation surveying, estate management and town planning. They are employed in private and public organisations such as property development companies, valuation consultants, local authorities and the national valuation office.

The courses and careers in the discipline of Surveying call for an interest and ability in the financial and legal aspects of the construction industry, and in the managerial skills applied to building and property developments.

To date, Property Economists have obtained suitable employment, mostly in private practice, but also in areas such as the financial investment departments of banks and insurance companies.

Dept. In Charge: Surveying & Building Technology.

B111 CONSTRUCTION ECONOMICS – DIPLOMA/DEGREE

C.A.O. Course Code: FT02

This is a four year part-time course which prepares students wishing to make their careers in Construction Economics. It is designed for those who wish to work as quantity surveyors and economics advisors in the construction industry or as building development co-ordinators and building managers. The course provides a sound general education in the different aspects of this field with emphasis on practical construction economy and, in consequence, the course incorporates such project work. Students are encouraged to gain industrial and professional experience during the summer vacations and in this way they are introduced to applying their technical knowledge to practical problems, working individually, or as a team.

Entrance Requirements: The minimum educational qualifications required for entry are the Irish Leaving Certificate with passes in six subjects, at least two of which must be at Grade C or higher in the higher level course or equivalent qualifications. The six subjects must include Mathematics and English.

First Year: Course of Study:

Second Year: Course of Study:

Third Year: Course of Study:

Fourth Year: Course of Study:
Building Economics, Construction Administration & Management, Measurement.

In the fourth year, each student prepares a major dissertation as part of the final examination.

Awards:
Graduates of this course are eligible for the following awards:
Diploma in Construction Economics (Dublin Institute of Technology)
Bachelor of Science (Surveying) (University of Dublin)

Recognition by Professional Bodies

Upon successful completion of a test of professional competence, holders of these awards are eligible for corporate membership of the Royal Institute of Chartered Surveyors (Quantity Surveyors Division), and the Construction Surveyors Institute. The Chartered Institute of Building requires graduates to undergo an additional examination in management subjects and satisfy an interview board as to their professional experience before admitting them to membership. Graduates are also accepted for entry to appropriate postgraduate courses in Ireland and abroad.

Career Opportunities
The qualifications is for the profession of Chartered Surveyor, which includes occupations in the field of construction and property management.

The Construction Economist is concerned with the more detailed aspects of the construction and site development. He may specialise as a quantity surveyor, in which case he analyses building design for purposes of cost planning and, later, detailed tendering and cost control. Alternatively he may practice as a building manager with responsibility for the organisation of contracts, for labour, materials, plant, and negotiations with main and sub-contractors.

The courses and careers in the discipline of Surveying call for an interest and ability in the financial and legal aspects of the construction industry, and in the managerial skills applied to building and property developments. In general, Construction Economics Graduates have obtained employment in quantity surveyors offices and in the construction industry with contractors and developers.

Dept. In Charge: Surveying & Building Technology.
CONSTRUCTION TECHNICIAN CERTIFICATE/DIPLOMA

This is a wholetime course leading to a Construction Technician Certificate award after two years and a Diploma award on completion of an additional year. It is designed to meet the needs of the construction industry for technical staff having a sound understanding of the principles of construction and construction materials, together with a good appreciation of management skills and the economics of the industry.

Entrance Requirements

First Year: Leaving Certificate with passes in five subjects, including Mathematics and English, or equivalent qualifications.

Third Year (Diploma Stage): Applicants are expected to have reached a good standard at the end of the Certificate or Second Year, or possess an equivalent qualification acceptable to the College.

Course of Study

Second Year: Builders Accounts, Building Materials & Environmental Science, Mathematics, Construction Technology I, Site Surveying I, Quantity Surveying I.

Third Year: Construction Technology II, Quantity Surveying II, Builders Accounts II, Site Surveying II, Estimating, Contract Law and Economics.

Students are encouraged to gain industrial experience during the summer vacation.

Awards

Students who successfully complete the course are eligible for the following awards:

- Construction Technician Certificate (Dublin Institute of Technology)
- Construction Technician Diploma (Dublin Institute of Technology)

Recognition by Professional Bodies

Holders of the Diploma are entitled to Associate Membership of the Chartered Institute of Building following two years experience in building practice. The Institute also grants exemptions in Law and Economics in the Final Part One examination for corporate membership.

The Construction Surveyors Institute admits holders of the Diploma to Licentiate Membership.

Career Opportunities

These awards are particularly suitable for those who wish to attain positions relating to production planning, purchasing, quality control, estimating, surveying, inspection and general administration in the construction industry. They also provide a suitable background for those who wish to make their careers in building in the public sector (i.e., Central and Local Government).

The majority of the past graduates work in building firms as Estimators, Building Surveyors, Programmers, Planners, Contract Managers and Site Managers. Many have attained a high level in management where they are now executive directors or managing directors. Other graduates are working for consultants in various capacities.

Dept. in Charge: Surveying & Building Technology.

GEO-SURVEYING TECHNICIAN CERTIFICATE/DIPLOMA

This wholetime course prepares students for a technician Certificate award in Geo-Surveying after two years and a Technician Diploma award on completion of an additional year. There is a good balance between the theoretical and practical aspects of Geo-Surveying thereby ensuring a sound understanding of the applications of its technology. Project work is a significant feature of the course and it is an important element in the overall assessment.

Entrance Requirements

First Year: Leaving Certificate with passes in five subjects including Mathematics and English or equivalent qualifications. Preference will be given to applicants with good grades in Mathematics.

Third Year (Diploma Stage): Applicants are normally expected to have reached Credit or Distinction level in the Certificate Examination at the end of the Second Year in order to qualify for admission into the Third Year. However, those holding a Pass Certificate and at least one year of appropriate post-Certificate experience will be considered.

Course of Study

Field camps are conducted at the end of both the First Year and
Second Year. In addition students are expected to gain practical experience during the summer vacation.

Awards

Graduates from this course are eligible for the following awards:
(a) Technician Certificate/Diploma in Geo-Surveying (Dublin Institute of Technology)
(b) National Certificate/Diploma in Geo-Surveying (National Council for Educational Awards)

Recognition by Professional Bodies

Holders of the Diploma are eligible for membership of the Society of Survey Technicians Institute of Civil Engineering Surveyors and for exemptions from the Part III Land Survey Examination of the Royal Institution of Chartered Surveyors.

Career Opportunities

The Geo-Surveying Technician may be employed in a wide variety of occupations such as with engineering, land survey and hydrographic consultancies as well as with mining, photogrammetric and construction companies.

The work can be very varied due to the variety of survey sites requiring different techniques and equipment but generally the work involves the preparation of a plan for a development or the setting out of a design on the ground for construction. The Geo-Surveyor should have a preference for an outdoor life and an ability to co-operate and work in a team with other specialists. Sophisticated optical and electronic instruments are commonly used in conjunction with computers and micro-processors in Geo-Surveying and some specialise in these.

Dept. in Charge: Surveying & Building Technology.

B116 AUCTIONEERING AND ESTATE AGENCY CERTIFICATE/DIPLOMA COURSE

This course has been developed to prepare students for a DIT Certificate in Auctioneering and Estate Agency after two years of full-time study.

It is envisaged that those holding the Certificate may proceed further to a Diploma award on a part-time or block release basis over a further twelve month period while in suitable employment. They will be required to undertake a prescribed course of study and course assignments and complete further examinations and a dissertation on an appropriate topic.

Entrance Requirements

The minimum entrance qualifications required for entry are: The Irish Leaving Certificate with passes in five subjects including Mathematics and English, or an equivalent qualification.

First Year

Course of Study

Second Year

Third Year

Enter into suitable employment, undertake prescribed study, carry out assignments and complete examinations and a dissertation on an appropriate topic.

Awards

Students who successfully complete the course are eligible for the following awards:
Certificate in Auctioneering and Estate Agency (Dublin Institute of Technology)
Diploma in Auctioneer, Estate Agency and Valuation (Dublin Institute of Technology)

Career Opportunities:
The course is suitable for those wishing to prepare for a career as an auctioneer, estate agent and property valuer and aims to give an understanding of the legal, economics and physical framework within which the property market functions. It also aims to give the basic skills needed to practice as an auctioneer.

Recognition by Professional Bodies

The course meets the academic requirements of both the Irish Auctioneers and Valuers Institute (JAVI) and the Institute of Professional Auctioneers, Valuers, and Livestock Salesmen. These are professional bodies in the field of Auctioneering and Estate Agency in the Republic of Ireland. Auctioneers and Estate Agents are involved in sales, lettings, management and valuation of property. Generally, they
work either in partnerships or practice on their own account.

The career is suitable for those with an interest in people and in the built environment. Other desirable character traits are an outgoing nature together with an ability to get on with people.

Dept. in Charge: Surveying & Building Technology.

B171 BUILDING MAINTENANCE TECHNICIAN CERTIFICATE COURSE

This new two-year wholetime course has been developed to prepare students for a Technician Certificate award in Buildings Maintenance. The programme extends over the full academic session from September to June. The course has a good balance between the theoretical and practical aspects and participants are given an appreciation of a range of construction skills. Students are encouraged to spend the summer vacation gaining practical work experience in the areas of Building Maintenance and Inspection, Building Supplies, Technical Sales and related activities.

Entrance Requirements

(a) Leaving Certificate with passes in five subjects including Mathematics and English. Special consideration will be given to applicants who have studied Building Construction as a Leaving Certificate subject.

(b) Equivalent qualification and suitable experience preferably in the construction sector.

An interview will form part of the selection process.

Course of Study

First Year

Second Year

Awards

Students who successfully complete the course are eligible for the Award of a Buildings Maintenance Technician Certificate (Dublin Institute of Technology).

Career Opportunities

The Buildings Maintenance Technician may find employment in a variety of areas such as Buildings Maintenance, Maintenance Contract Administration, Building Inspection, Building Supplies and DIY Sales, Technical Sales, Trainee Estimating, Purchasing Officer, etc.

There may also be opportunities in these areas for self employment.

Dept. in Charge: Construction Trades.

Brickwork projects in one of the College's workshops
PRELIMINARY ENGINEERING

This is a one-year full-time course commencing each year in mid-September. Its main purpose is to prepare students for entry into the first year of the College's Engineering Diploma/Degree Courses B121, B122, B123, B124.

Entrance Requirements:
The Irish Leaving Certificate of the Department of Education with good passes in Mathematics, English and three other subjects, or equivalent qualifications. In practice the typical candidate gaining admission will probably have a number of 'Honour' grades.

Course of Study:
The subjects studied are: Mathematics, Mechanics, Engineering Technology, Physics, Chemistry, Engineering Drawing, Communications and Liberal Studies.

Examination and Other Requirements
Students are required to:
(a) take a College examination at the end of the session.
(b) present laboratory notebooks and project work reports to the satisfaction of the college.

Admission into Professional Engineering Courses
Students who reach the required standard in the College examination may qualify for admission into the first year of courses B121, B122, B123, B124 without further assessment and are notified of this early in July. They do not have to apply through the CAO system.

Dept. in Charge: Engineering Technology

BUILDING SERVICES ENGINEERING - DIPLOMA/DEGREE

C.A.O. Course Code: FT04

This is a new four year whole-time course which prepares students with a suitable aptitude and educational background for a career in Building Services Engineering. It is a broadly based course in the early years, and becomes more specialised in Building Services Engineering in the later stages. Project work is a major element in the programme. At third year a joint project with Architectural and Surveying students is undertaken and in the final year a specialised thesis or design project is required. The course requires a good mathematical and analytical ability. Students are encouraged to obtain suitable summer employment in the industry to complement their studies.

Entrance Requirements
The minimum educational qualifications required for entry are the Irish Leaving Certificate in six subjects with Grade C or higher on higher level papers in Mathematics and a suitable Science subject (i.e. Physics, Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies and Engineering) and a pass in four other subjects which must include English, or equivalent qualifications.

Course of Study
First Year

Second Year

Third Year

Fourth Year
A major project is also undertaken.

Awards
Graduates are eligible for the following awards:
Diploma in Engineering (Dublin Institute of Technology)
Bachelor of Science (Engineering) (University of Dublin)

It is expected that they will also be eligible for membership of the Institution of Engineers of Ireland and acceptable for entry to appropriate university post-graduate courses in Ireland and abroad.

Career Opportunities
The qualification is appropriate to those wishing to make their careers in Building Services Engineering which is concerned with design and installation of the Mechanical and Electrical Services necessary to ensure the efficient operation of modern buildings. They form part of the team of professionals involved with construction projects and work closely with Architects, Quantity Surveyors and Structural Engineers.

Recognition by Professional Engineers, design offices, contracting firms, research organisations, as well as state and semi-state agencies and local authorities. Some may pursue post graduate studies in Ireland or abroad directly after graduating or they may go abroad to work initially and in this way gain wider or specialised experience.

Dept. in Charge: Engineering Technology.
MECHANICAL ENGINEERING – DIPLOMA/DEGREE

C.A.O. Course Code: FTO4

This is a four year wholetime course which prepares students with a suitable aptitude and educational background for a career in Mechanical Engineering. It is a broadly based engineering course over the first two years with specialisation in the third and final years and it requires a good mathematical and analytical ability. Project work is an important element in the programme and commences in the second year. A major project is undertaken in the final year on which both a thesis and oral presentation are required. Laboratory work is undertaken throughout the course. Students are encouraged to obtain suitable summer employment in engineering to complement their studies.

Entrance requirements

The minimum educational qualifications required for entry are the Irish Leaving Certificate in six subjects with Grade C or higher on higher level papers in Mathematics and a suitable Science subject (i.e. Physics, Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies and Engineering) and a pass in four other subjects which must include English, or equivalent qualifications.

First Year

Course of Study

Mathematics, Mechanics, Engineering Drawing, Engineering Technology, Physics, Materials Science, Communication and Social Studies, Workshop and Laboratory Work.

Second Year

Third Year

Final Year

Awards

Graduates of this course are eligible for the following awards:

- Diploma in Engineering (Dublin Institute of Technology)
- Bachelor of Science (Engineering) (University of Dublin)

Career Opportunities

The qualification is appropriate to those wishing to specialise in either General Mechanical or Process Engineering. Mechanical Engineers are likely to be involved with the design and construction of all types of equipment ranging from individual items to complete factories or process plants. They may also be involved with the management of projects and industries and with the maintenance of plant and equipment.

Graduates have good prospects of employment in general mechanical engineering or processing firms, with state and semi-state bodies, and research organisations. The range of jobs available includes designing, development, consulting engineering and plant management. Some also pursue postgraduate studies in Ireland or abroad directly after graduation or they may go abroad to work initially and in this way gain wider or specialised experience.

Dept. In Charge: Engineering Technology.

PRODUCTION ENGINEERING – DIPLOMA/DEGREE

C.A.O. Course Code: FTO4

This is a four year wholetime course which prepares students with a suitable aptitude and educational background for a career in Production Engineering. It is a broadly based engineering course over the first two years with specialisation in the third and final years in Production Engineering. It requires a good mathematical and analytical ability. Project work is an important element in the programme and commences in the second year. A major project is undertaken in the final year on which both thesis and oral presentation are required. Laboratory work is undertaken throughout the course. Students are encouraged to obtain suitable summer employment in engineering to complement their studies.

Entrance Requirements

The minimum educational qualifications required for entry are the Irish Leaving Certificate in six subjects with Grade C or higher on higher level papers in Mathematics and a suitable Science subject, (i.e. Physics, Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies and Engineering) and a pass in four other subjects which must include English, or equivalent qualifications.

First Year

Course of Study

Second Year

Recognition by Professional Bodies

They are eligible for membership of the Institution of Engineers of Ireland and are also accepted for entry to appropriate university postgraduate courses in Ireland and abroad.
Third Year

Fourth Year

Mathematics and Computing, Control Engineering, Manufacturing Technology, Mechanics, Materials Science, Production Management and Laboratory Work.

A major project is also undertaken.

Awards

Graduates of this course are eligible for the following awards:
- Diploma in Engineering (Dublin Institute of Technology)
- Bachelor of Science (Engineering) (University of Dublin)

Recognition by Professional Bodies

They are eligible for membership of the Institution of Engineers of Ireland and are also accepted for entry to appropriate university postgraduate courses in Ireland and abroad.

Career Opportunities

The qualification is appropriate to those wishing to specialise in either Manufacturing or Production Engineering. Production Engineers are likely to be involved with the manufacture of all types of products ranging from individual items to large batches using robotics and highly automated machines. They may also be involved with the management of projects and industries and with the maintenance of plant and equipment.

Graduates have good prospects of employment in manufacturing firms, with state and semi-state bodies and research organisations. The range of jobs available includes design, industrial engineering, production and factory management. Some also pursue post-graduate studies in Ireland or abroad directly after graduation or they may go abroad to work initially and in this way gain wider or specialised experience.

Dept. In Charge: Engineering Technology.

Building Services Engineering students at work on a project.

B124

STRUCTURAL ENGINEERING – DIPLOMA/DEGREE

C.A.O. Course Code: FTO4

This is a four year wholetime course which prepares students with a suitable aptitude and educational background for a career in structural engineering. It is a broadly based engineering course in the early years, specialising in structural design in the later stages. Project work is a major element in the programme and in the final year a thesis and oral presentation of the special topic studied are required. Students are encouraged to obtain suitable summer employment in the industry to complement their studies.

Entrance Requirements

The minimum educational qualifications required for entry are the Irish Leaving Certificate in six subjects with Grade C or higher on higher level papers in Mathematics and a suitable Science subject, (i.e. Physics, Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies and Engineering) and a pass in four other subjects which must include English, or equivalent qualifications.

Course of Study

First Year

Second Year

Third Year

Fourth Year

A major project is also undertaken.

Awards

Graduates are eligible for the following awards:
- Diploma in Engineering (Dublin Institute of Technology)
- Bachelor of Science (Engineering) (University of Dublin)

Recognition by Professional Bodies

They are eligible for Membership of the Institution of Engineers of Ireland and are also accepted for entry to appropriate university postgraduate courses in Ireland and abroad.

Career Opportunities

The qualification is appropriate to those wishing to make their careers in Structural Engineering, which is a specialisation of Civil Engineer-
ing. Structural Engineers are concerned with the design and construction of buildings, bridges and special structures. They form part of the team of professionals involved with construction projects and in this way work closely with Architects, Quantity Surveyors and Building Services Engineers.

Graduates have prospects of employment with structural design offices, contractors, research organisations, as well as state and semi-state agencies and local authorities. Some pursue post-graduate studies in Ireland or abroad directly after graduating or they may go abroad to work initially and in this way gain wider or specialised experience.

Dept. In Charge: Engineering Technology.

CIVIL ENGINEERING TECHNICIAN – CERTIFICATE AND DIPLOMA

This course prepares students for a Technician Certificate award in Civil Engineering at the end of two years and for a Technician Diploma award at the end of a further year of study. The students attend the College from the end of September until the end of May each year and they spend the Summer months gaining practical experience in approved Civil or Structural Engineering design offices, construction sites, etc. The course requires an analytical ability to understand and solve technical problems.

Entrance Requirements

First Year: Leaving Certificate with good passes in Mathematics, a Science subject (preferably Physics), English and two other subjects or equivalent qualifications.

Third Year (Diploma Stage): Students are expected to reach Credit or Distinction level in the Certificate Examination at the end of the second year to qualify for admission to the third year of the course leading to the Diploma award. Students who hold a Pass certificate and at least one year of appropriate post-Certificate experience may also be considered. The Diploma stage is specialised and is focussed on Structural Design.

Course of Study

First Year

Second Year (Certificate Stage)
Structural Design and Detailing, Mathematics, Concrete, Geology and Soil Mechanics, Surveying, Construction Services and Supplies, Planning and Administration, Complementary Studies, Laboratory Work.

Third Year (Diploma Stage)
Theory of Structures, Structural Design (Steel), Structural Design (Concrete), Municipal Engineering, Mathematics, Computing, Management Studies and a Project.

Examination and Other Requirements

(a) Students take a College examination at the end of each year which is moderated by the National Council for Educational Awards, and the Dublin Institute of Technology.
(b) They are required to submit reports on their project and laboratory work.

Awards:
Graduates of this course are eligible for the following awards:
(a) Technician Certificate/Diploma in Civil Engineering (Dublin Institute of Technology)
(b) National Certificate/Diploma in Engineering (Civil) (National Council for Educational Awards)

Recognition by Professional Bodies
Those who have successfully completed the Certificate State of this course meet the academic requirements for Technician status with the Institution of Engineers of Ireland, while those who have completed the Diploma stage meet the Technician Engineer level requirement and can qualify for the non-Corporate Associateship grade of membership after they have completed a suitable period of practical training.

Career Opportunities
The qualification is appropriate to those wishing to enter engineering as a Technician specialising in Civil Engineering. Civil Engineering Technicians may be involved in the design and construction of buildings, bridges, roads, water supply, sanitary services, etc. They may also be involved in drafting, surveying, laboratory and field work, and the planning and supervision of contracts.

Graduates have prospects of employment in contracting firms, engineering design offices, state and semi-state bodies, and research organisations engaged in Civil Engineering work.

Dept. In Charge: Engineering Technology.
This course prepares students for a Technician Certificate award in Building Services Engineering at the end of two years and for a Technician Diploma award at the end of a further year of study. The students attend the College from the end of September until the end of May each year and they spend the Summer months gaining practical experience in Heating, Ventilating and Air Conditioning design in Consulting Engineers' offices and related industry. The course requires an analytical ability to understand and solve technical problems.

Entrance Requirements

First Year: Leaving Certificate with good passes in Mathematics, a Science subject (preferably Physics), English and two other subjects or equivalent qualifications.

Third Year (Diploma Stage): Students are expected to reach Credit or Distinction level in the Certificate Examination at the end of the second year to qualify for admission to the third year of the course leading to the Diploma award. Students who hold a Pass Certificate and at least one year of appropriate post-Certificate experience may also be considered.

Course of Study

First Year

Second Year

Third Year

Examination and Other Requirements

(a) Students take a College examination at the end of each year, which is moderated by the National Council for Educational Awards and The Dublin Institute of Technology.
(b) They are required to submit reports on their projects and laboratory work.

Awards

Graduates of this course are eligible for the following awards:
(a) Technician Certificate/Diploma in Environmental/Building Services Engineering (Dublin Institute of Technology)
(b) National Certificate/Diploma in Engineering (Building Services) (National Council for Educational Awards).

Recognition by Professional Bodies

Those who have successfully completed the Certificate stage of this course meet the academic requirements for Technician status with the Institution of Engineers of Ireland, while those who have completed the Diploma Stage are at Technician Engineering level and can qualify for the non-Corporate Associateship grade of membership after they have completed a suitable period of practical training.

Career Opportunities

The qualification is appropriate to those wishing to enter engineering as a technician specialising in Environmental/Building Services Engineering. Environmental/Building Services Engineers are involved with the design and installation of all types of building services such as heating, ventilation, air-conditioning, water and electrical services. They are also involved with the drafting, planning and management of projects and the maintenance of plant and equipment.

Graduates have good prospects of employment with mechanical services contractors and in design offices. The range of jobs available includes engineering design, maintenance engineering, consulting engineering and technical sales.

Dept. In Charge: Engineering Technology.
MECHANICAL ENGINEERING TECHNICIAN – CERTIFICATE AND DIPLOMA

This course prepares students for a Technician Certificate award in Mechanical Engineering at the end of two years and for a Technician Diploma award at the end of a further year. The students attend the College for eight months each year commencing in September, and they spend the Summer period getting practical experience in industry, design offices, etc. The course requires an analytical ability to understand and solve technical problems.

Entrance Requirements

First Year: Leaving Certificate with good passes in Mathematics, a Science subject (preferably Physics), English and two other subjects of equivalent qualifications.

Third Year (Diploma Stage): Students are expected to reach Credit or Distinction level in the Certificate Examination at the end of the second year to qualify for admission to the third year of the course leading to the Diploma award.

Students who hold a Pass Certificate and at least one year of appropriate post-Certificate experience may also be considered. The Diploma stage is specialised. At present two options are offered – Manufacturing Technology or Process Plant.

Course of Study

First Year

Second Year

Third Year

Examination and Other Requirements

(a) Students take a College examination at the end of each session, which is moderated by the National Council for Educational Awards and the Dublin Institute of Technology.

(b) They are required to submit reports on their project and laboratory work.

Awards

Graduates of this course are eligible for the following awards:
(a) Technician Certificate/Diploma in Mechanical Engineering (Dublin Institute of Technology)
(b) National Certificate/Diploma in Engineering (Process or Manufacturing) (National Council for Educational Awards).

Recognition by Professional Bodies

Those who have successfully completed the Certificate Stage of this course meet the academic requirements for Technician status with the Institution of Engineers of Ireland, while those who have completed the Diploma Stage are at Technician Engineer level and can qualify for the non-Corporate Associateship grade of membership after they have completed a suitable period of practical training.

Career Opportunities

The qualification is appropriate to those wishing to enter Engineering as a Technician specialising in Mechanical Engineering. Mechanical Engineers and Technicians are concerned with the design, manufacture and installation of all types of equipment ranging from individual items to complete factories or process plants. They may also be involved in drafting, detailed planning and management of projects and with plant maintenance.

Graduates have prospects of employment in manufacturing or processing firms, research organisations, as well as state and semi-state agencies.

Dept. In Charge: Engineering Technology.

Metalurgical microscope in use in one of the College laboratories.
TECHNICIAN CERTIFICATE IN TRANSPORT ENGINEERING – DIPLOMA IN MOTOR INDUSTRY MANAGEMENT

Entrance Requirements
This whole-time course prepares students for entry into the many and varied responsible positions in the Motor Industry. The course leads to the award of a Transport Engineering Technician Certificate at the end of two years study and to the award of the Diploma in Motor Industry Management at the end of a further year’s study.

Leaving Certificate with passes in five subjects, including Mathematics and English, and preferably Physics or equivalent qualifications.

Course of Study
First Year

Second Year

Third Year

Examination and Other Requirements
Progress to successive years of the course will be on the basis of the student’s work during the session, and success in the College sessional examination. Only students who successfully complete the Certificate stage and who display an aptitude for management will be accepted for the Diploma Stage. A requirement of the course is that students spend 2-3 months of each Summer Vacation in suitable employment in the Motor Industry gaining appropriate experience. Where students are unable to arrange this employment, the Institute of the Motor Industry, the College Authorities and the Student Society of Motor Industry Management may assist in their placement.

Awards
Graduates of the course are eligible for the following awards:
Technician Certificate in Transport Engineering (Dublin Institute of Technology)
Diploma in Motor Industry Management (Dublin Institute of Technology).

Recognition by Professional Bodies
Graduates holding the Diploma are eligible for full exemptions from the examination requirements of the Institute of Motor Industry and, by taking an extra examination in Road Transport Management qualify for exemption from the examinations of the Institute of Road Transport Engineers.

Career Opportunities
There are many and varied career opportunities in the automobile and transport industries for those completing these courses including the following: Vehicle Body Repair Supervisor, Garage Service Department Supervisor, Reception Engineer, Vehicle Salesperson, Training Advisor, Vehicle Finance Company Representative, etc. Generally they progress to more senior management positions in the Retail Motor Industry or Transport Industry.

Dept. in Charge: Automobile Engineering.
This course is designed to prepare young people for technical managerial positions in printing and related industries. The course leads to a DIT Certificate in Printing on its successful completion after two years of study and to a Diploma in Printing Management after a further year's study.

Entrance Requirements

First Year: Leaving Certificate with passes in five subjects including Mathematics and English, or equivalent qualifications.

Diploma Stage (Third Year): Certificate in Printing with Credit or Distinction or a pass with one year's relevant work experience or an acceptable equivalent qualification.

Course of Study

The following subjects are included in the Certificate programme:
- Design for Printing
- Electronic Composition
- Printing Processes
- Bookbinding and Print Finishing
- Applied Science
- Mathematics
- Computer Applications
- Production Planning
- Accounting
- Costing and Estimating
- Marketing

The following subjects are included in the Diploma (third year) programme:
- Management
- Accountancy
- Marketing
- Estimating
- Production Planning
- Quality Control
- Costing
- Computer Science
- Languages
- Management Science

Awards

Graduates from this course are eligible for the following awards:
(a) Technician Certificate in Printing (Dublin Institute of Technology)
(b) Diploma in Printing Management (Dublin Institute of Technology).

Career Opportunities

The majority of graduates to date have found positions in printing, publishing, or advertising as estimators, cost accountants, production planners, or sales personnel, while others become technical representatives for print materials and equipment suppliers.

Dept. In Charge: Printing and Graphic Communication.

Students following the Graphic Reproduction Technology course design and process a wide range of items for print production. They are trained in photocomposition, camera and studio work, paste-up and planning, offset printing, screen printing and print finishing, and are expected to use these skills to produce finished products from their own designers.

(1) National Diploma in Design of the National Council for Educational Awards

(2) National Certificate in Design of the National Council for Educational Awards with distinction or credit

(3) National Certificate in Design of the National Council for Educational Awards with a pass and one year's relevant work experience

(4) Equivalent qualifications.

Intending students will be expected to present a portfolio of recent work.

Applications for admission to this course must be made directly to the College. Applicants must hold one of the above Third Level qualifications to be eligible for admission. The course is not open to school leavers for direct entry.

Course of Study

Awards

Graduates of the course are eligible for the following award: Diploma in Graphic Reproduction Technology (Dublin Institute of Technology).

Career Opportunities

Graduates find suitable employment with advertising agencies, design studios, printing firms and publishing companies. They will also be capable of setting up and running their own studios.
