Preface

This volume contains a series of studies on cultural astronomy in honour of Clive Ruggles and his groundbreaking work in the field, written by a selection of his close colleagues. We hope that the volume is both a fitting tribute to Clive and a significant contribution to the further development of cultural astronomy as an academic discipline.

On behalf of the editors, the publishers have made a donation to the Alice Ruggles Trust on publication of this book. For more information about the Alice Ruggles Trust and its work, go to alicerugglestrust.org.
